My profession is a truck driver. I subscribe to Satellite Radio. I rely on it for everything. I could not exist out on the road without it. I do not understand how the National Association of Broadcasters can dictate what I can listen to. I need the weather reports for my safety. Cable TV has their weather channels. Don't let someone take this away from me. Satellite Radio has the right to provide what we want and need. REJECT THE NAB'S PETITION 04-160
